<https://andreas-ppalis.github.io/ba/>

Adaptable, organized, quick learner and teamwork-oriented Data Business Analyst with great experience in data management, data processing, business analysis, reporting and presentations. Adept at collaborating with cross-functional teams and advising on data-driven decision-making. Highly educated, possessing a Bachelor's degree, two Master's degrees and professional certifications. Bilingual in Greek (native) and English (fluent), with an intermediate understanding of Italian.

WORK EXPERIENCE

Business Analyst

HFM | Larnaca, Cyprus | Feb 2026 – Present

- Own end-to-end business requirements for assigned projects within the company's trading vertical, engaging directly with stakeholders through structured discovery calls to translate business needs into clear, actionable requirements.
- Conduct pre-analysis to assess project scope and feasibility, and prepare Software Requirements Specifications, user stories, and data flow diagrams in Jira/Confluence ahead of submission deadlines.
- Deliver both client-facing and internal projects for the trading vertical, including process improvement and automation initiatives, while coordinating with Product Managers, Engineers, Designers, and QA throughout the development lifecycle.
- Review and validate project output following development and QA, ensuring deliverables meet defined requirements before release.

Data Business Analyst

RetailZoom | Nicosia, Cyprus | Aug 2021 – Jan 2026

- Analyze market and retail data to identify trends, estimate market sizes using statistical models, and provide actionable insights that support client strategic planning and performance evaluation.
- Design and maintain process documentation, data flow diagrams, and dashboard specifications, ensuring alignment between business objectives and technical implementation.
- Automate repetitive data workflows and quality assurance checks using Python and SQL, reducing processing time, proactively flagging anomalies, and improving data accuracy.
- Lead the creation of client-facing Power BI dashboards and custom Excel/Python reports, translating business needs into technical specifications and collaborating with BI developers and Client Service Managers to deliver accurate, tailored insights.
- Supervise junior analysts to ensure consistency to operational processes, maintain high data quality standards, and provide guidance on analytical workflows and problem-solving.

Trader/Analyst

Cleverpath Holdings Ltd | Nicosia, Cyprus | Sep 2020 – Jul 2021

- Monitored in-play events and analyzed customers' behavior and activity.
- Analyzed financial data for retail shops, calculating net profit to identify shop profitability, while visualizing KPIs using Python (Matplotlib and Seaborn) and Excel.

EDUCATION

MSc in Business Intelligence with Data Analysis

Cyprus International Institute of Management (CIIM) | Nicosia, Cyprus | Feb 2021 – Dec 2022

- Graduated with Grade 84/100
- Thesis: *Predicting Football Results Using Machine Learning* – Built a predictive model for match outcomes using scikit-learn and historical data.
